FAHAD AHMED

Software Engineer | Python Backend & AI Integration

Karachi, Pakistan | +92 315 2731351 | fbinashfaq@gmail.com | FahadBinAshfaq.com
linkedin.com/in/fahad-bin-ashfaq07 | github.com/Fahd-Bin-Ashfaq

PROFESSIONAL SUMMARY

Software Engineer specializing in Python backend development and AI integration, currently building AI chatbots and assistants for the logistics industry. Experienced in FastAPI, REST APIs, data pipelines and Docker, with a published research paper in *Artificial Intelligence Review* (Springer Nature).

TECHNICAL SKILLS

Programming Languages: Python, JavaScript (Node.js), SQL
Backend Development: FastAPI, Flask, REST API Design, Microservices, Authentication
AI & Automation: AI Chatbots, AI Assistants, LLM API Integration, Prompt Engineering, Workflow Automation
Data Engineering: ETL Pipelines, Pandas, Data Cleaning, Real-Time Dashboards, Streamlit
Databases: MongoDB, MySQL / SQL Databases
DevOps & Tools: Docker, Linux, Git, GitHub, Postman
Security: Secure Coding, Vulnerability Assessment, Wireshark, Nmap, Burp Suite

WORK EXPERIENCE

Software Engineer (AI & Backend) | Office Automation Service (Logistics) | Full-time | 02/2026 – Present
- Driving AI adoption in logistics operations by designing and deploying an AI-powered chatbot that automates customer and operational query handling.
- Built an AI assistant that streamlines internal workflows and gives staff instant access to operational information.
- Develop scalable Python backend services and REST APIs with FastAPI and Flask to power AI features and business applications.
- Manage data with MongoDB and SQL, test APIs with Postman, and deploy services using Docker on Linux.
- Maintain clean, collaborative codebases with Git and GitHub through branching, pull requests and code reviews.

Associate Data Engineer | Queless (Pvt.) Ltd. | Full-time | 01/2025 – 01/2026
- Built a real-time sales dashboard with Python, Streamlit and SQL that tracks order-taker performance by time, item and individual sales, giving management live visibility into top performers and best-selling items.
- Developed Python ETL pipelines to extract, transform and validate data from multiple sources.
- Automated data cleaning and reporting workflows with Pandas and SQL, reducing manual reporting effort.
- Integrated REST APIs and MongoDB to keep data accurate and consistent across systems.

IT Instructor | BanoQabil | Part-time | 12/2023 – Present
- Teach Python, software development, Git and GitHub, and web development through hands-on projects.
- Mentor students in problem-solving, secure coding practices and building job-ready portfolios.
- Guide students through real-world programming projects from idea to working application.

Research Assistant | Sindh Madressatul Islam University | Internship | 03/2024 – 07/2025
- Conducted research in cybersecurity and network security, including threat analysis and vulnerability assessment.
- Collected and analyzed research data and prepared technical reports, contributing to a published review paper.

PROJECTS

AI Assistant for Logistics Operations
- Designed and built an AI assistant that automates routine logistics tasks and answers staff queries in natural language.
- Integrated LLM APIs with backend services to deliver accurate, context-aware responses from company data.

Technologies: Python, FastAPI, LLM APIs, Prompt Engineering, MongoDB, Docker

AI Chatbot Integration (Logistics)
- Developed and integrated an AI chatbot into logistics operations to handle customer and operational queries automatically.
- Built conversation workflows and API integrations for real-time, 24/7 automated support.

Technologies: Python, FastAPI, LLM APIs, REST APIs, Docker

WhatsApp Chatbot Integration
- Built a WhatsApp chatbot with a Node.js backend using the Baileys WhatsApp Web API for automated messaging.
- Implemented message handling, automated replies and real-time conversation workflows.

Technologies: Node.js, JavaScript, Baileys, REST APIs

META Scan (Final Year Project)

- Developed a Python desktop application that scans folders and detects suspicious or harmful files.
- Built a clean user interface with Flet and automated file analysis using security scanning libraries.

Technologies: Python, Flet, File System Analysis

EDUCATION

Bachelor of Science in Software Engineering | Sindh Madressatul Islam University | 11/2021 – 09/2025 | CGPA: 3.2

Intermediate (Pre-Engineering) | Govt. S.M. Science College | 03/2019 – 09/2020

PUBLICATION

Generative AI Revolution in Cybersecurity: A Comprehensive Review of Threat Intelligence and Operations | *Artificial Intelligence Review* (Springer Nature) | 05/2025
Mueen Uddin, Muhammad Saad Irshad, Irfan Ali Kandhro, Fuhid Alanazi, **Fahad Ahmed**, Muhammad Maaz, Saddam Hussain, Syed Sajid Ullah

CERTIFICATIONS

- CS50: Fundamentals of Computer Science (Harvard University)
- DevOps Fundamentals
- Python for Data Science

VOLUNTEERING & LEADERSHIP

- **Host, Youth Club Event** | SMIU: Managed stage activities, audience engagement and event flow.
- **Event Coordinator** | Google DevFest: Helped plan, coordinate and run student-focused tech events.
